Professional Overview

Automation Specialist with experience in designing efficient workflow systems to improve business operations. Skilled in automation, web development, and system management, with a practical approach to solving problems and improving efficiency.

Educations

University of the East - Manila   2021 - 2025
B.Sc. Information Technology   College Graduate

Experience

IT Automation Specialist   Aug. 2023 - Present
Chess Learning Academy

Developed tech-driven solutions by integrating automation, web development, and data systems to streamline workflows and improve operational efficiency.

- Delivered IT solutions for web management, system reliability, and process automation, enhancing efficiency across sales, finance, marketing, and other core departments.
- Built custom workflow systems using Slack, Google Workspace, Make.com, n8n, Airtable, Cal.com, and Discord, and Botcake, supported by Postman, Webhooks, and GitHub.
- Streamlined operations by automating routine tasks and integrating digital tools across departments.

Projects

HomeLab   Apr. 2024 - Present

Self-hosted, internet-exposed infrastructure on Proxmox with a focus on secure, high-availability deployments.

- Secured public access using Cloudflare Tunnel and CrowdSec for automated threat mitigation
- Deployed production-ready services like Ghost CMS and FileBrowser with reverse proxy and SSL
